HE WAIVED A HEARING.

Young Flinn Thinks He Can Surely Get It.

The United States Court room in the post-office building was filled with an interesting crowd at 2 o'clock yesterday afternoon waiting to hear the outcome of the preliminary trial of Harry Flinn in the embezzlement case of the Marine National Bank. Assistant District Attorney Alcorn represented the Government for United States Attorney Lyon, who was not present. Major E. A. Montooth was on hand for the prosecution. James H. Porto and J. Scott Ferguson had charge of the defense.

The hearing was waived until the October term of court. The defense wanted the bill fixed at \$5,000, and afterward at \$7,500, but the prosecution wanted \$10,000. It was not obtained, and Flinn went back to jail. Judge Acheson can lower the bill below \$10,000, but it is hardly thought he will do so. An interview with the Flinn reporter after the trial young Flinn said he thought his attorneys would get bail for him.

Rule 13 provides for filling vacancies on the committee. The chairman of the County Committee shall appoint six vice-chairmen and all sub-committees.

A CLEAR EXPLANATION.

One of the Leading Professional Men of the City Defines the Great Danger That is Threatening Americans.

A well-known physician, while at the club the other evening, was approached by one of his friends, who abruptly said: "Doctor, what is Paresis, anyhow?" The doctor looked at his questioner sharply for a moment, motioned him to a seat, and said: "Paresis, my friend, is, in brief, 'consumption of the nerves and brain.' It has many ways of manifesting itself, and almost insuperable causes."

A number of prominent club men gathered round to hear what the eminent doctor had to say on this subject, which is at present so agitating the community. The doctor continued: "The man whose head trembles as he lifts his glass of wine has the sure symptoms of Paresis. The woman who feels a sinking sensation in the midst of her social career is entertaining an unwelcome guest—none other than the demon Paresis. What causes it? Overwork, excitement, indulgence, high living and dissipation in all its forms. A pain in the head, inability to remember names or faces, periods of melancholy, all these are the symptoms of Paresis. It is a terrible thing! Naturally you ask, 'What can we do?' Be careful of your manner of living. Do not overtax your energies or vitality, and take the only discovery which has ever been made for Paresis, either in its first or last stages, which is Paine's Celery Compound. I have seen a great deal of this wonderful remedy, which was made by the late Prof. Phelps, of Dartmouth College, and which is so highly recommended and endorsed by the medical profession and scientists generally, and I believe if man and woman would use it carefully and systematically they would certainly avoid the first symptoms and final stages of Paresis, with all the horrors which they bring."

A serious expression came over the face of the listeners as the doctor spoke, and many men who had been comparatively gay and thoughtless before were serious when he continued. The revelation of the fact that Paresis has been so alarmingly increasing throughout America during the past few years, has necessarily caused apprehension on the part of many men and women who have believed themselves to be in perfect health, and the timely remarks and valuable advice given by the doctor, above, should carry their lesson to the thousands who may have the seeds of this terrible disease and who do not know it.

The Pew and Emerson Oil Company finished two new wells yesterday on the Mercer farm in western Ohio, which will yield production amounting to 500 barrels of oil.

The line is to be composed of 12-inch pipe, and it will start at the northern Murrayville and extend to the south, crossing the river at Wilkinsburg. This makes the third main line of that company from Murrayville to this city, and the company is now drilling two new wells in the northern Murrayville, and both are expected to be brought in within a few days.

Cured of Catarrhal Asthma.

Mrs. Alice Brownhill, an English lady, but who has lived in this country for nearly two years, has for the past ten years been badly afflicted with asthma. It was produced by a catarrhal poison in her system that was slowly but surely doing its deadly work. A part of the secretion that formed in her head was discharged through her nose, and a part dropped down the back of her throat, and which, setting up an irritated condition in her lungs, produced asthma. She coughed, and her breath at times was very short. She had pains under her shoulder blades, and also over her eyes. Her appetite was very poor, and the little food she was able to eat gave her stomach much distress and belching of gas, and every morning she would vomit up her food. As has been stated, her breath was very short, and every time she caught a cold she would have to be bolstered up in bed during the night in order to breathe. When she applied, last April, to the physicians of the Cat
